No. DPS/NZR/A/Admn./2025

Date: 28.10.2025

REPORT ON GRIHA PROJECT 2025-26

Delhi Public School ONGC Nazira, Sivasagar (Assam) has adopted several sustainable practices under the GRIHA for Existing Schools initiative. The school ensures efficient energy management through the use of BEE 3-star-rated inverter ACs, LED lighting, and a 102 kWh/day solar PV system installed in 2019.

It also maintains solar streetlights and a battery-based power backup to reduce the use of diesel based DG. Classrooms and offices are designed for comfort with natural ventilation, false ceilings for insulation, and adequate daylight.

Two rainwater recharge pits with desilting chambers are functional, and low-flow fixtures help reduce water wastage. The campus follows effective waste management through segregation using green and blue bins, a vermicomposting unit, buyback policy for e-waste and a paper recycling setup.

Students are actively involved in eco-friendly initiatives such as making herbal repellents, plastic bricks and cloth bags. The school's Eco Club conducts plantation drives, floor gardening (Green Corridor) and sustainability awareness programs.

Universal accessibility is ensured through ramps and shadow teachers, and dedicated rest areas and toilets are provided for support staff. Through these initiatives, DPS ONGC Nazira demonstrates its commitment to creating a green, inclusive and sustainable learning environment.

We are deeply honoured to receive the ‘**GRIHA Exemplary Performance (EP) Award 2025**’ (Special Mention) under the Existing Schools category from the GRIHA Council during the 17th GRIHA Summit to be held at New Delhi.
