I. ACADEMICS:

There is a great saying that "Education is simply the soul of a society as it passes from one generation to another. "As we present this year's activity update, we take pride in our modesty and claim that we accomplished as much as we could have anticipated. We are very pleased of our teachers and students who work extremely hard to go above and beyond expectations.

Academic excellence is the distinguishing feature of any reputed institution. Students at DPS ONGC, Nazira have benefited from a culture of hard work and a "***never say never***" mentality that has been fostered from the start, leading to strong academic performance. When it comes to academics, we have two major exams—the mid-term and final—as well as recurring assessments to gauge the students' academic performance. Academics are crucial for preparing students to succeed in this cut-throat environment where they must elevate themselves.

PTA meetings were held on a regular basis to update parents on their child's progress. We value and appreciate the support of all parents in our mission to provide high-quality education, and once again we thank you for your cooperation.

Schools play a critical role in helping students establish lifelong healthy behaviour. VIII. CHANGES IN PEDAGOGICAL APPROACHES

Pedagogy plays a crucial role in determining the learning outcomes of students. A well-designed pedagogical approach can foster critical thinking, problem-solving skills, and creativity among students. DPS, ONGC Nazira has the most effective pedagogies taking NEP 2020 into account. It includes a range of teaching techniques, including a detailed guide for teachers, structured and whole-class group work, guided learning, assessment practice and individual activity. We create learning resources that support active learning in the classroom with the help of ICT. Competitions are held in schools on various topics and subjects based on indigenous and traditional learning across- mathematics, science, philosophy, yoga, architecture, medicine, agriculture, literature, sports etc.

IX. A GLIMPSE OF INFRASTRUCTURAL INPUTS OVER THE YEAR:

Education is a fundamental right for every child, and quality education plays a crucial role in shaping their future. A school's physical infrastructure holds an all-important role in providing a conducive environment in a student's academic journey and another key facet is Digital Infrastructure. Technology-enabled classrooms foster opportunities for teaching and learning by integrating learning technology, such as computers, specialized software, audience response technology, assistive listening devices, networking, and audio/visual capabilities are said to have met great success and putting this aspect into account we at DPS ONCC, Nazira have provided full power back up to our N-Computing lab so that the systems can continue their operations without experiencing any disruption or delay.

We have also added one more asset to our school infrastructure by constructing a basketball court for our students that will aid in the physical and emotional well-being of students and promote face-to-face interactions and a greater sense of community among students.

X. TEACHER TRAINING & ACHIEVEMENTS

"Teachers are also learners." Staying updated is the key to success in any field, especially, in education. A school's success stems from the diligent efforts of its teachers, parents, and students as well as the prompt assistance of other departments inside the school. I want to convey our profound appreciation and thankfulness to all those who are directly and indirectly associated with our institution. I also want to express my gratitude to each and every trustee for their unwavering support and direction.

Finally, but just as importantly, the faculty, staff, and students of the school deserve special recognition for their unwavering commitment, sincerity, and perseverance in pursuing excellence in every facet of learning in the school.

On behalf of teachers and other staff, I now take this opportunity to commit ourselves to do our best at all times to honorably serve the institution and every stake holder. In the end, I would like to conclude with the lines, "Don't tell us sky is the limit when there are footprints on the moon"!
